📍 No:5-1, Panavilai Street, Kottar, Nagercoil – 629002

PROFESSIONAL SUMMARY

Full Stack PHP Developer with 5+ years of experience building and maintaining scalable web applications using PHP 8.x (Laravel, CodeIgniter, Core PHP), Node.js, and modern frontend technologies (HTML5, CSS3, JavaScript, Bootstrap, Tailwind CSS). Strong expertise in RESTful API development, MySQL/MariaDB query optimization, third-party API and payment gateway integration, and Linux/AWS server deployment. Experienced in Agile/Scrum methodology with a proven record of delivering measurable performance improvements — including 30% API response time reduction and 40% form processing efficiency gain. Currently working remotely as a Full Stack PHP Developer for a Dubai-based client.

TECHNICAL SKILLS

Backend	PHP (Laravel), Node.js, Express.js, Core PHP, REST API Design
Frontend	HTML5, CSS3, JavaScript, AJAX, Bootstrap, Tailwind CSS, Blade Templates
Databases	MySQL, PostgreSQL, MongoDB, Query Optimization, Database Design
Auth & Security	JWT, Laravel Sanctum/Passport, Role-Based Access Control (RBAC), CSRF Protection
Methodologies	Agile (JIRA, Sprint), Waterfall, RESTful API Best Practices
Tools & IDE	VS Code, Sublime Text, GitHub Copilot, Claude AI Agent

PROFESSIONAL EXPERIENCE

Heroapps, Dubai (Remote) — *Full Stack PHP Developer* Dec 2025 – Jun 2026

- Building and maintaining full-stack PHP web applications using Laravel and Core PHP for a Dubai-based client.
- Developing and documenting RESTful APIs consumed by web and mobile frontends.
- Building responsive admin panels with HTML5, CSS3, Bootstrap, and Blade Templates.
- Deploying and managing applications on Linux servers; collaborating via Git, JIRA, and Agile/Scrum sprints.
- Developed HaaiCards — a digital visiting card platform using Core PHP, JavaScript, and QR code integration.

Capecom Solution, Nagercoil — *Backend Developer (Laravel)* Nov 2022 – Nov 2025

- Led backend development of multiple Laravel-based projects including REST APIs and admin dashboards.
- Designed and implemented scalable RESTful APIs consumed by web and mobile clients, improving data sync reliability.
- Optimized database queries and applied Laravel caching strategies, reducing average API response time by 30%.
- Implemented secure authentication using Laravel Sanctum/Passport and built role-based access control systems.
- Managed complete SDLC from requirements gathering to production deployment using Agile and Waterfall methodologies.

Minitzon Technologies, Chennai — *PHP Developer* Apr 2022 – Oct 2022

- Developed and maintained PHP-based web applications, building dynamic pages and backend logic.
- Worked on database design and optimization using MySQL, improving query performance.
- Contributed to RESTful API development and integration with third-party services.

Shiro Software Solutions, Nagercoil — *Web Developer* Feb 2019 – Mar 2022

- Started IT career building websites and web applications using PHP, HTML5, CSS3, and JavaScript.
- Gained hands-on experience with MySQL database design, Git version control, and responsive UI development.

EDUCATION

B.Sc Computer Science — Sivanthi Aditanar College, Pillayarpuram

June 2012 – May 2015

Career Note: After graduation, worked in local business (2015–2018) before independently pursuing web development through self-study and coursework in 2018, leading to first IT role in 2019.

PROJECT EXPERIENCE

CTS Dashboard – Ecommerce Backend (Capecom Solution)

- Built and maintained a Laravel backend managing inventory, sales, and purchase orders across 4 e-commerce datasets.
- Increased form processing efficiency by 40% using Laravel Form Request validation and custom request classes.
- Reduced API response latency by 30% through RESTful API optimization, eager loading, and query refactoring.
- Applied Laravel caching (Redis/file) and query optimization, cutting overall load time by 20%.
- Integrated backend charting and reporting tools, improving data-driven decision-making by 35%.
- Centralized state logic using Laravel Service and Repository patterns for consistent data management.

Housing Guards Listings – Service Management Platform

- Developed a Laravel backend to manage contractors, service requests, and project workflows end-to-end.
- Built a dynamic admin panel using Laravel Blade with user, project, and service listing management.
- Designed RESTful APIs for seamless communication between the backend and frontend clients.

Kiran Smart Apron – Service & Workflow Management

- Built RESTful APIs supporting both web and mobile apps with real-time data synchronization.
- Implemented secure authentication and RBAC using Laravel middleware for safe, restricted data access.
- Developed a responsive Laravel Blade admin dashboard for activity logs, reporting, and user management.

HMI Guitars – Ecommerce Platform

- Developed and maintained the complete backend of an eCommerce platform using Core PHP and MySQL, managing products, orders, customers and payment workflows.
- Built an admin panel for product management, inventory tracking and order processing, using PHP, HTML, CSS and JavaScript.
- Designed and implemented RESTful APIs for frontend-backend integration, with secure data handling through PDO prepared statements and server-side validation.

HaaiCards – Digital Visiting Card Platform

- Built using Core PHP and JavaScript with QR code-based contact sharing functionality.
- Implemented a dynamic template system allowing users to generate and customize digital visiting cards.
- Designed the full database schema and backend logic for template rendering and user management.
